25X1A

MEMORANDUM FOR: Dr. John F. Allums
Office of Emergency Planning
6108 FDIC Building
17th and F Streets, N.W.
Washington, D.C.

SUBJECT : Soviet Civil Defense: Policies and
Priorities

1. I believe that the attached report may be of interest to you. It indicates that civil defense in the USSR continues to be a centrally directed but low cost approach to population protection. The system is keyed to receiving several days warning of strategic attack and its effectiveness is severely dependent on such warning.

2. New interest in civil defense preparedness has recently been expressed by prominent Soviet leaders. However, there is no indication that basic changes have occurred in civil defense concepts or programs in relation to the expanded pace of Soviet deployment of advanced weapons, and no evidence that significantly increased resources are being made available to the Soviet shelter program.
